(54) MULTIPLEX BROADCAST KEYWORD RETRIEVAL SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a multiplex broadcast keyword retrieval system which notifies that it is retrieved when specific information is retrieved from the main broadcasting that is transmitted through multiplex broadcast and data that is superimposed on carrier of the multiplex broadcast.

SOLUTION: This system is provided with a multiplex receiving means 1 which receives broadcast data that is different from the main broadcast that is transmitted by a multiplex broadcast wave, a 1st keyword inputting means 5 which registers a keyword that becomes an object to be supervised, a 1st storing means 4 which stores a keyword that is registered from the means 5, a storing means 2 for retrieval which temporarily stores broadcast data for keyword retrieval, a 1st retrieving means 3 which performs keyword retrieval from the broadcast data and a notifying means 7 which notifies that corresponding broadcast data is retrieved.

LEGAL STATUS

[Date of request for examination]

25.07.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than
the examiner's decision of rejection or
application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
